How to Activate the Mediasite Module in Sakai

Within a course in Sakai, click on the Site Info module on the lefthand side of the page.

Then click on the Page Order tab.

There should be a series of options like those pictured here. Find the Mediasite option. It is turned off by default. Turn it on by clicking on the lightbulb.
Then a Mediasite Module will appear on the lefthand side of the screen.

Once you click on the Mediasite Module, you will see an EDIT button on the top right of the screen.

This is where you will add the Catalog link from Mediasite. All of the other options should populate correctly (such as key & secret). Once entered, click on the Update Options button at the bottom of the page.

Note: If the catalog doesn’t work, make sure that it is “https”
