

The **Teaching with Technology Certificate of Completion** provides participants the opportunity to explore ways to increase student engagement and improve instructor presence by using strategies and tools to create a technology-enhanced learning environment. This series will address fundamentals, methods, and implementation of technology to improve the overall learning experience.

Objectives:

Analyze the use of technology in education.

Recognize the impact of implementing technology and its role in enhancing instructor presence in an online learning community, regardless of class size.

Design instructional materials that utilize technology to meet the needs of diverse learners and improve the student learning process.

This certification is comprised of three online workshop. Each workshop will be:

- ✓ completed within fourteen days after course launch.
- ✓ limited to the first 30 registrants.
- ✓ awarded a badge for successful completion of all requirements.

Workshop:

Technology to Improve Instructor Presence:

Participants will explore strategies and tools to create an effective online instructor presence and incorporate technology into teaching. Participants will practice creating engaging and interactive instructional videos.

Register for the next offering at <http://citt.ufl.edu/training/ttc/>

Technology to Captivate Students :

Participants will review strategies to engage diverse learners and build a learning community through the use of technology. The course materials and activities will explore ways to improve student engagement and promote student feedback.
